BULK'S
NURSERIES
Babylon, Long Island, N.Y.

An Invitation

TO YOU—TO VISIT OUR NURSERY

OFFICE BUILDING AND ENTRANCE TO NURSERY

You will find a visit to our Nursery very interesting and worth while. Many acres of highest-quality stock in a wide range of plant varieties are available for your inspection and selection.

A visit when the Ornamental Trees, Shrubs, or Rhododendrons are in bloom is especially interesting and is an excellent time for making selections. Information concerning the various plants and their proper use and care will be cheerfully given.

PLANNING AND PLANTING SERVICE

PLANNING the garden and home landscape is just as important in the development of a real home as planning the house. Well-planned grounds provide a harmonious setting for the house. Let us work with you and help you with your planting problems. Artistic and satisfactory landscape effects are the result of careful planning and the proper use of the right plant material. Our Landscape Department is maintained as part of our service to our customers, so that you may realize the utmost pleasure and satisfaction in the use of our materials.

The ability and experience of Bulk's Nurseries are reflected in the landscaping of many fine home-grounds, estates, and public plantings throughout Long Island and suburban New York. "PLANTED BY BULK'S NURSERIES" is synonymous with first-class workmanship, tasteful arrangement, and lasting satisfaction.

We will gladly draw sketches and plans to fit your particular needs, whether it be for a complete treatment of the entire grounds, a foundation planting, a special planting of any kind, or a revamping of an established planting. This service, in most cases, is rendered free of cost, except where elaborate plans, specifications, and special trips are necessary, in which case a small fee will be charged, which will be credited to our customer's account when order is placed.

Phone Babylon 444, or drop us a card and our representative will be glad to call on you to make suggestions and offer advice, without obligation to you. Our service extends throughout entire Long Island and the Metropolitan area.

Appointments at your home, any day including Sunday, will be gladly made and kept.

NURSERY SALES SERVICE

Prompt and efficient service is available for those who wish to call and select plants to take home with them. Our Nursery is open on Sundays during planting season, and experienced nurserymen will assist you in making selections, and show you around.

Our nursery stock is the finest that skill and good culture can produce, and our plants have an abundance of fine fibrous roots which are so essential for continued healthy growth.

HONEST VALUE

for every dollar invested in our products is the policy of Bulk's Nurseries, and we are proud to live up to this reputation. Our prices are as reasonable as is consistent with the highest grade of materials, and we invite you to make comparisons with any stock of similar quality.

PLANTING SEASONS

Evergreens may be planted from the time the frost leaves the ground until the latter part of June, though early planting is much preferred. Some varieties can be moved satisfactorily during the summer months. August, September, and October are excellent months.

Plant shrubs, trees, and fruit trees from the latter part of March until June, and from the middle of October until the ground freezes. Pot-grown Roses can be moved the entire summer and continue to bloom.

SALES DEPARTMENT

TO FACILITATE and make it convenient for home-owners to select and take along plants in their cars, we are maintaining a Sales Department where choice, freshly dug plants are taken from the Nursery and put on display, thereby saving you the time of covering our complete nursery, which is extensive.

These plants are ready to load into your car, and many customers have developed their grounds by gradually picking up plants as they can afford them. Deliveries can be arranged by our truck, at slight additional cost.

From time to time, special sales will be conducted, and you will find our Sales Ground a place where dependable nursery stock can be obtained at unusually attractive prices.

Experienced nurserymen are at your service and will be glad to offer advice and make suggestions.

Flower seeds, lawn seed, fertilizers, and insecticides are stocked for your convenience.

To serve you, the Sales Department will be open on Sundays, holidays, and in the early evening during the planting seasons.

GENERAL DIRECTIONS FOR ORDERING AND OUR TERMS

Always give address and desired time of delivery; otherwise we forward by the most economical route. Practically all our deliveries will be made by our trucks. Our free-delivery radius, on orders amounting to \$10 or more, on plants as listed in this Catalogue, extends 30 miles from our Nursery. This enables distant customers to get the benefit of local prices. During planting season, loads are combined for each locality at least twice a week. Beyond this 30-mile limit, a small charge will be made for delivery to cover cost, unless otherwise arranged at time of sale.

The cost of planting, if we do it, is borne by the purchaser. Our charge merely covers the cost of labor, fertilizer, etc.

GUARANTEE

Because all our stock is freshly dug and reaches the customer in fine, healthy condition, and because of the utmost care and skill used in growing our plants, we agree to replace any plants sold, at the prices published in this book, that may die within one year from date of delivery from other causes than abuse or neglect, but we make the following reservations:

The account must be paid within 30 days from date of invoice.

The customer pays the cost of delivery and planting of the replaced plants.

In the event we shall not have in stock, at the time for replacement, plants like those originally supplied, we are to apply the amount of credit representing the cost of the original plants toward the purchase of other plants that the customer may at the time select and which we can supply.

We guarantee our stock to be true to name and will replace any that proves otherwise, or refund purchase price.

The air-view below indicates to some extent the size of our nurseries. It is here that Bulk's quality stock is carefully grown for you.

ATTRACTIVE HOME PLANTINGS

There is an inviting air of hospitality about attractively planted home-grounds. For many years our Landscape Department has been of real service in helping the home-owner realize the best possible development of the home-grounds. Careful planning is essential and our Landscape Department welcomes the opportunity of helping you plan.

Include your Planting Program in your building budget. Attractive development of the grounds is just as important as the construction of the house, and in the end often makes or breaks the ultimate charm of the new home.

ORNAMENTAL and SHADE TREES

IN ADDITION to the trees which are valued for their shade, there are flowering trees which, at different times during the spring and summer, shower the lawn with their bloom. Do not forget that while shade trees add materially to the property value and landscape charm of your home, the initial cost is very small as compared with the enjoyment that you receive. The average shade tree is a long investment and returns your money manifold throughout the years of its usefulness.

The abbreviation "cal." means the caliper or diameter of the tree 6 inches above the ground.

Trees where B&B. is indicated are dug with ball of earth and burlapped. For varieties not marked B&B., add 20 to 30 per cent additional to price listed for B&B., according to size of ball needed.

• FLOWERING SHRUBS •

WHETHER planted individually or collectively, shrubs are an important feature in the adornment of any grounds. In groups they can be made to emphasize some feature of the lawn, to screen the garage, the laundry-yard, or some unsightly view. Among borders of the lawn, along walks and drives and in corners, collections of shrubs may be gathered that will give a succession of bloom from early spring until fall. In the list that follows will be found shrubs for all such purposes.

Except where noted otherwise, a charge will be made for digging shrubs with ball of earth (B&B.), as follows: 1 to 2 ft., 15 cts. each; 2 to 3 ft., 20 cts.; 3 to 4 ft., 25 cts.; 4 to 5 ft., 35 cts.; 5 to 6 ft., 50 cts.; 6 to 7 ft., 75 cts.; 7 to 8 ft., \$1.

PLANT TREES FOR YOUR CHILDREN

Many parents have planted trees and designated them for their children, who have seen the trees growing up with themselves. Unquestionably their lives have been enriched as a result. Many fine shade trees could be planted for this purpose. Perhaps the Elm which is so graceful, or the Oak with its enduring solid growth, or a flowering tree might be appropriate.

The informal type of planting usually offers the best possibilities for developing the home-grounds. The graceful curves, avoidance of straight lines and regularity serve to create a restful and natural effect.

A somewhat formal type of planting sometimes works out to good advantage when the plot is square or rectangular. In this plan the central feature is a vine-covered pergola with stone-flagged floor. The boundary planting consists of neatly trimmed hedge and flowering shrubs, edged with flowers. Evergreens create the necessary accent points.

Open lawns are restful

A pleasing combination of Yews and broad-leaved evergreens

Broad-leaf Evergreen Shrubs lend themselves very well to combination plantings with choice evergreens. They are slow growing, rich in color and texture, and provide colorful flowering effects.

Upright Japanese Yews and the various types of dwarf and spreading Yews, when combined with Broad-leaf Evergreens, make a splendid and lasting home-planting.

Azaleas and Pachysandra combine well

The above illustration showing Azaleas and Pachysandra effectively planted suggests a simple treatment for small home gardens. The Pachysandra provides a useful evergreen ground-cover and helps to tie into the picture this mass of colorful Azaleas. What is more significant—the Pachysandra serves as protective covering for the soil and helps to conserve the moisture.

Timely Hints for Successful Landscape Planning

Start out with a definite object in view. Secure a plan of development.

Avoid straight lines and sharp angles as much as possible. Graceful curves are so much more pleasing to the eye.

Plan to leave the center of the lawn unobstructed, and plant attractive borders of trees and shrubs in masses. Give thought to interesting skyline or silhouette effect. Avoid too much variety in planting. Masses of a kind are more effective.

Choose plant material carefully and be sure to use the right plants in the right places.

BROAD-LEAF EVERGREENS

WITH few exceptions, no grounds, either small or extensive, should be without some representative of this rich and interesting group of plants. They endure shade, and their rich blossom and foliage effect makes them almost indispensable. Certain varieties of this class, such as Rhododendrons, Azaleas, and Laurel, ordinarily grow more satisfactorily and show to better advantage when planted in rather heavy masses. A deep, cool, moist subsoil, with proper drainage, is ideal. As a rule, they dislike lime, or limestone soil, and success will be more certain on such soils if they are planted in woods earth or mulched with peat moss. Oak leaves are ideal for covering the ground beneath them.

AZALEA

For Deciduous Azaleas, see page 9

Azalea amœna. *Japanese Azalea.* Purple-red blooms produced in a solid mass during April and May. The lustrous leaves take on a rich bronze in the fall, making this a most attractive plant. It is a vigorous grower. Does well in shady locations.

• EVERGREENS •

IN this group are contained some of the most valued plants for landscape effects. The diversity of color and habit of growth in this class provide truly "a plant for every place and purpose," some for limited areas of foundation plantings or for bed and border uses, others for screens, hedges, windbreaks, and for group and specimen plantings. They are always desirable for any landscape plantings for both summer and winter effects.

ABIES • The Firs

Abies concolor. *White Fir.* Rapid-growing evergreen, with long, bluish green needles, and of symmetrical, upright habit. Splendid as a lawn specimen, as a contrast with the darker foliage of other trees, and is also useful in screen and border plantings. It is a tree of great dignity and stateliness and when given plenty of room to develop naturally, it keeps its magnificent lower branches until late in life.

Upright Japanese Yew Hedge

Hicks' Yew Hedge

Evergreen Hedges

From time immemorial people have used hedges and fences to protect their property from intrusion and to secure privacy. Until recently an evergreen hedge meant quite an expense, but they have now come down to a price-level within the reach of every home-owner. We invite you to compare the prices listed below with the cost of a fence.

	6 to 7 ft. 18 00

P. nigra (austriaca). *Austrian Pine.* A stately Pine, vigorous and rapid grower; very hardy. Long, rich green needles. It thrives on any soil, inland or near the sea. One of the finest Pines for general planting, thriving in either the smoke- and gas-laden air of cities or the braeing salt air of the seashore. While it will stand trimming, it looks much better when allowed to grow naturally.

Each	Each
2 to 3 ft. \$2 00	7 to 8 ft. \$13 00
3 to 4 ft. 3 00	8 to 10 ft. 20 00

TAXUS (The Yew)

Without question, the Yew (*Taxus*) in its various forms is the outstanding evergreen for use on the home-grounds and in general landscaping, for its dark green, rich-textured foliage is always fresh-looking and attractive. It is extremely hardy, not affected by cold or heat, and will grow in shade as well as sun. A slow grower and lends itself well to shearing. There are forms for various uses which are described below.

Taxus baccata bulki. *Bulk's Yew.* A dwarf, upright variety of Yew with numerous vertical stems. Compact grower; useful for hedges. Dark bluish green foliage.

Each	Each
1½ to 2 ft. \$2 00	2½ to 3 ft. \$4 00
2 to 2½ ft. 3 00	3 to 3½ ft. 5 00

T. baccata repandens. *Spreading English Yew.* Of graceful, spreading form. The most prostrate of all the Yews, and one of the finest low-growing evergreens because of its adaptability to shade or sunlight.

Each	Each
15 to 18 in. \$2 00	3 to 3½ ft. \$8 00
1½ to 2 ft. 3 00	3½ to 4 ft. 11 00

BUDGET YOUR LANDSCAPE WORK

It is possible to carry out a complete and comprehensive landscape treatment of your grounds over several seasons, with the cost distributed over the various stages of planting. For many people who are reluctant to consider landscape improvements because they do not feel they can afford a comprehensive plan, this is a very satisfactory way of landscaping.

Let us show you how a complete landscaping can be divided and carried out this way. As your plan progresses, so will your enthusiasm, and you will never be sorry for it.

BULK'S HARDY ROSES

ROSES—the mere name is an inspiration to garden lovers. Nothing can take the place of the Rose. Almost every home has room for at least a few. Roses will grow in any fertile soil, but are much improved in bloom, fragrance, and beauty by rich soil, liberal fertilizing, and good cultivation. Branches should be well cut back early each spring.

All Roses, except field-grown Hybrid Teas, carry our regular guarantee

PERENNIALS

IT IS no wonder that these old-fashioned hardy garden flowers continue to increase in popularity, for there is not a time during the whole flowering season when some hardy perennial is not in bloom, and when, during the late summer, few shrubs are in blossom, these little plants may be depended on for attractive display. Plant perennials this year in the flower-bed where you have been using annuals. Every year you have to replace annuals, whereas the perennials come up each season with very little work or expense.

Prices for Perennial Plants, except where otherwise noted: Strong field-grown plants, 25 cts. each, \$2.50 per doz., \$18 per 100 plants; large clumps, 35 to 50 cts. each

You do not need a large estate to have an old-fashioned garden or border from which you can pick flowers from early spring until late fall. Let us help plan your garden.

The size mentioned in the description indicates the height the plants may be expected to attain at maturity; the month represents the season of bloom.

There are no finer autumn flowers than the modern Chrysanthemums and you will like our new varieties.

ADDING CHARM WITH ROCKWORK

Very often the attractive use of rocks in the landscape marks the difference between that which is ordinary and that which is outstanding.

In the hands of the landscape designer, rocks can be used with a great deal of charm in appropriate places. Perhaps your grounds call for an interesting rockery or a combination of pool and rock-garden.

Why not let us look over your grounds and tell you of such possibilities.

FRUIT AND NUT TREES

FRUITS

In the extremities of the lawn or upon the adjoining lot, plant fruit trees. They will bountifully reward you in the fruit they yield, which you will enjoy eating right from the trees or in winter as preserves and jam. The fruit-garden can easily be made a part of the scheme for beautifying your property. Flowers along the walk to the orchard will brighten the way and provide blooms for cutting.

Spraying of Fruit Trees. For best results we recommend three sprayings: First, during the winter; second, after the blossoms fall; and, third, about two weeks later. This will control the most prevalent insects and fungous diseases attacking fruit trees on Long Island. We have men experienced in this kind of work who are available at a moderate cost.

NUTS

Set out a few Nut Trees. They make splendid ornamental trees and yield a bountiful harvest of nuts. We are offering only improved varieties, best suited to Long Island conditions. Grafted trees.

CHESTNUT, Chinese Hairy. Blight-resistant. Wonderful ornamental value. Nuts resemble American Sweet Chestnut.

BEFORE PURCHASING PLANTS CONSULT WITH US

The right way to get the best out of every dollar spent in plants is to consult the specialist. While plants are sold as merchandise they cannot be regarded from the same standpoint as other merchandise. They are living things meant to grow and to accomplish a certain purpose. It is not a matter of quantity or price. It is a matter of getting a plant suitable to your soil and the situation in which it has to grow. This is our specialty—we are interested in your results. We want to help you to select plants and use them in the right way. Consult with us now while the planting season is here.
